

## CALL FOR ABSTRACTS

*The International Conference on  
Coal Science & Technology (ICCS&T)  
26 to 29 October 2009, Cape Town*

**Abstracts due 15 March 2009**

### **International Conference on Coal Science & Technology (ICCS&T), 26 to 29 October 2009**

*With the renewed interest in fossil fuels and the need for clean coal technologies research and development is continuously required to ensure the best solutions are tabled for the deployment of the most appropriate technology options.*

*In today's world, it is crucial to understand and effectively manage the impact of fossil fuels on the environment, and to optimize the utilization of these natural materials, through continuous improvements in carbon and energy efficiencies.*

*The ICCS&T conference provides the technical community an opportunity to share with others their meaningful contributions in their respective clean coal technology fields.*

*You are cordially invited to attend and participate in this prestigious conference to be held for the very first time in Africa at the Lagoon Beach Hotel in Milnerton, Cape Town.*

**Registration  
Now Open**

*Gert Lamprecht Photography*

For more information visit us at: <http://www.iccst.info>

### **Preliminary technical topics of interest:**

- Coal chemistry
- Coal beneficiation
- Coal mineralogy
- Coal ash
- Coal conversion  
(combustion, gasification, metallurgy)
- Geochemistry / Geophysics
- Coal and the Environment
- Coal tar, pitch and coke
- Clean coal technological aspects
- Alternative use of coal

**Continue with interactions  
through the web page**

**sasol**  
reaching new frontiers
