

The Fossil Fuel Foundation of Africa in association with the IEA Clean Coal Centre, UK  
is proud to announce

# ZIMBABWE

## Coal Indaba 2012

**29 & 30 March 2012**

Venue to be confirmed, Zimbabwe

### Experiences, Opportunities and Applications for the Coal in the Zimbabwean Region of Southern Africa

The purpose of this conference is to update delegates on the latest developments and opportunities available in the Zimbabwean Coalfields, one of the last major coal resources of southern Africa. A visit to Hwange Colliery Company and Zesa Power Station will be arranged.

Topics will include:-

- The geological environment in Zimbabwe and associated regions
- The prospecting landscape for coal, CBM and UCG
- Coal mining – current and future prospects
- Developments in the energy situation – power generation, coal to liquids, metallurgical prospects and export
- Transport and logistics for the future
- Water affairs, Acid mine drainage (AMD) and future developments
- Company case studies on recent developments
- Ecology and Climate Change
- Minerals Policy, Legal and Regulatory Framework
- Global overview of coal demand and technologies for power

If you wish to receive:-

- Receive further information
- Sponsor some aspect of the conference
- Exhibit at the conference
- Submit a paper for presentation
